Professional Summary

Senior iOS Engineer with 8+ years of experience shipping high-traffic apps for Nike ME, Under Armour ME, and Sun & Sand Sports, with expertise in secure authentication (OAuth 2.0, OIDC) and token management. Reduced crash rate from 2.1% → 0.3% on Nike ME, achieved 60 FPS scrolling on 1K+ product listings, and cut CI/CD deployment time by 50%. Proficient in Swift, MVVM/Clean Swift, and AI-assisted development (Ollama, MCP, Cursor AI, OpenCode) — reducing boilerplate by 35% and accelerating prototyping. Built a custom MCP server in Swift for worklog automation, self-hosted n8n pipelines for web scraping, and OpenCode agentic workflows for PR review and design-to-code implementation.

Technical Skills

- Languages & Frameworks: Swift, Objective-C · UIKit, SwiftUI, AppKit, Catalyst · Combine, AVFoundation, CoreData, CloudKit, APNS, App Intents, async/await
- Architecture & UI: MVVM, Clean Swift, VIPER, MVC · Auto Layout, SnapKit, Programmatic UI, XIB, Storyboards · RTL / Bilingual Support
- Networking & Auth: RESTful, GraphQL, WebSockets, gRPC · URLSession, Alamofire, JSON:API · OAuth 2.0, JWT, SSO, SAML, OIDC
- Testing & Quality: XCTest, XCUITest, TDD, Code Coverage · Instruments (Time Profiler, Leaks), LLDB, Memory Graph Debugger, Charles Proxy
- CI/CD & DevOps: fastlane, Bitrise, Azure Pipelines, GitHub Actions, Jenkins · Firebase Distribution, TestFlight, App Store Connect
- Third-Party & Analytics: Firebase (Crashlytics, Analytics, Remote Config, A/B Testing) · Branch, MoEngage, Salesforce SDK · GA4, Facebook SDK
- AI & Agentic Workflows: Ollama (local LLMs), Claude API, Cursor AI, GitHub Copilot, OpenCode, Kiro · Agentic AI, Prompt Engineering, Function Calling / Tool Use · MCP Servers (custom Swift, Xcode, Azure DevOps, Figma bridge)
- Automation & Scraping: n8n (Docker / Oracle Cloud hosted) · Web Scraping / Data Extraction, Google Sheets API, Telegram Bot API, Cron Scheduling · Power Automate, Google Apps Script
- Tools & Storage: CocoaPods, SPM · CoreData, SwiftData, SQLite, Token Management, Keychain · Figma, Sketch, InVision · Git, Gitflow, Postman (PreRequest/PostResponse Scripts, Automated API Testing), Swagger
- iOS Frameworks: UIKit, SwiftUI, AppKit, Catalyst, Combine, AVFoundation, CoreData, CloudKit, APNS, App Intents, Siri Shortcuts, async/await, Structured Concurrency
- Infrastructure: Docker, Docker Compose, AWS EC2, Oracle Cloud, Unix/Linux Administration

Professional Experience

Senior Software Engineer, Brainvire Infotech Pvt. Ltd. May 2021 – Present

- Led iOS development for Nike ME, Under Armour ME, and Sun & Sand Sports, serving 10K+ active users. Architected scalable features (recommendations, rewards, checkout, inventory) across all three platforms.
- Reduced Nike ME crash rate from 2.1% → 0.3% and achieved 60 FPS scrolling on 1K+ product listings by optimising main-thread operations with Instruments Time Profiler.
- Integrated Ollama local LLMs and MCP servers (Xcode + Azure DevOps + Figma) into the development workflow, cutting boilerplate by 35% and accelerating sprint prototyping.
- Built a custom MCP (Model Context Protocol) server in Swift to log work directly on the company portal; AI agents connect to the local MCP to automate worklog entry via LLM Function Calling / Tool Use.
- Deployed a self-hosted n8n pipeline (Docker + Oracle Cloud) for automated job-posting web scraping, with a custom n8n node for AI-driven job-relevance filtering, Google Sheets logging, and cron-triggered Telegram notifications.
- Used OpenCode as a terminal-based agentic AI assistant integrated with Atlassian, Bitbucket (PR review), Figma (design-to-code), and GitHub (PR creation and code review) for autonomous development tasks.
- Automated API testing in Postman using PreRequest and PostResponse scripts, building full reusable API test runs for regression testing.
- Built CI/CD pipelines with fastlane and Bitrise, reducing deployment time by 50%; delivered 20+ production releases for Under Armour ME with zero critical post-release bugs. Integrated OAuth 2.0 for secure user authentication, leveraging Keychain for token management.
- Optimised API caching strategy, reducing network calls by 25% and improving responsiveness by 40%. Mentored 5+ developers on MVVM, VIPER, and iOS best practices.

Software Engineer, Tristate Technology LLP June 2018 – May 2021

- Built modular iOS applications in Swift/UIKit; implemented advanced multithreading with GCD and Operation Queues, improving app responsiveness by 45%.
- Reduced crash rates by 20% and memory footprint by 20% through Instruments profiling, defensive programming,

and comprehensive XCTest coverage.
- Integrated RESTful APIs with robust offline support and error handling; implemented JWT-based authentication for secure user sessions. Contributed to 5+ shipped apps across healthcare and event management domains.

Key Projects

Nike ME – Sr. iOS Developer View on App Store
April 2024 – Present | Team: 6 developers | Swift · SwiftUI · MVVM · Apple Pay · Firebase · Time Profiler

- Architected modular SwiftUI product catalog and checkout flows; reduced crash rate from 2.1% → 0.3%; achieved 60 FPS scrolling for 1K+ products by optimising main thread. Integrated Apple Pay and bilingual Arabic/English support.

Under Armour ME – Lead iOS Developer View on App Store
July 2022 – Present | Team Size: 3 developers | Swift · MVVM · Combine · Branch · MoEngage · Salesforce SDK

- Built analytics system capturing 20+ conversion events via Branch, MoEngage, and GA4; integrated Tabby/Tamara BNPL and Salesforce chat; enabled CMS-driven promotions eliminating App Store submissions for marketing updates.

Sun and Sand Sports – Senior iOS Developer View on App Store
September 2021 – Present | Team: 6 developers | Swift · Clean Swift · UIKit · JSON:API · Kingfisher · Google Maps

- Designed multi-brand e-commerce platform with custom filtering across 10K+ SKUs; optimised image loading with Kingfisher caching; redesigned homepage with JSON:API-driven CMS; integrated Knet and regional payment gateways.

Additional Projects

- Open source: Azure Pipeline Mobile & Bitrise Pipeline Mobile (React Native) — CI/CD management apps with pipeline triggering and real-time build status; Shipyard Connect for ASC (SwiftUI + App Store Connect API; shipped on the Mac App Store; JSON:API parsing, multi-team support).
- Custom MCP Server (Swift) — Company worklog: Model Context Protocol server that lets AI agents log work directly on the company portal via LLM Function Calling / Tool Use.
- Job Scraper Pipeline (n8n + Docker + Oracle Cloud) — Self-hosted n8n workflow for automated job-posting web scraping with a custom AI job-relevance filtering node, Google Sheets logging, and cron-triggered Telegram bot notifications.
- OpenCode Agentic Workflows — Terminal-based agentic AI assistant connected to Atlassian, Bitbucket (PR review), Figma (design-to-code), and GitHub (PR creation and code review) for autonomous development tasks.
- Medznat (medical platform, bilingual EN/RU, video playback) · Trophy Cloud (real-time Socket chat, participant voting).

Education

Bachelor of Engineering in Information Technology — Government Engineering College, Modasa, Gujarat 2014–2018

Certifications

- AI For Developers With GitHub Copilot, Cursor AI & ChatGPT – Udemy
- Learn GitHub Actions for CI/CD DevOps Pipelines – Udemy
- AWS: Block Storage, Object Storage, EBS, Snapshots, AMIs, Image Builder, EFS – Udemy
